

# Counter Terrorism & Search-Position Ranking & Analysis System (CTS-PRAS)

## MAPPING AND ANALYSIS – Uses & Applications

CTS-PRAS software is a Counter Terrorism and Search Planning Tool, used for missing person & crime searches. It provides detailed assessments for defensive event, aviation security and counter UAV work.

CTS-PRAS is deployed globally by Police, Law Enforcement & Military agencies, within the UK, USA, Canada, Australia, France and Germany.

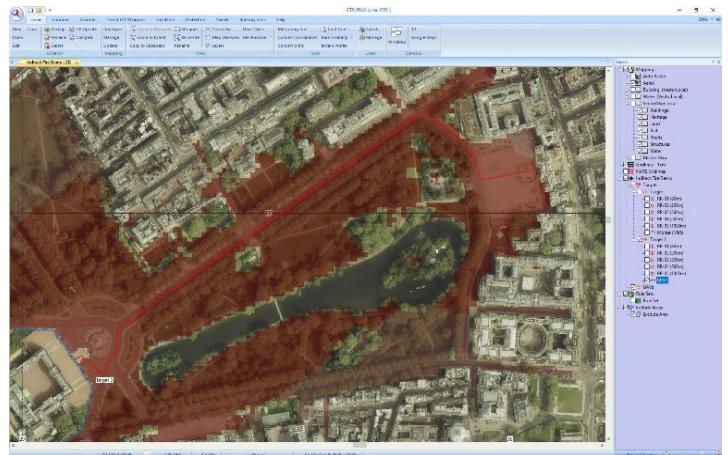

- Used for missing persons & major crime searches
- Helps manage high profile events & VIP visits
- Produces incident response plans allowing quicker decision making
- Offers a complete solution of hardware, software, mapping, support and training
- 2018 uses include; British Grand Prix, Trooping the Colour, Sandringham Palace and nerve agent attacks in Salisbury

*Left: Image showing Wiltshire PoISA using CTS-PRAS to display the Search Areas to the Search Teams*

- Delivers detailed assessments for lasers, rockets, RPG's, mortars, UAV and snipers
- Provides the ability to quickly locate, task and search the right areas, saving officers valuable time to ultimately **help save lives**
- Runs a secure network for support and linkage to specified services such as Resilience Direct or National Police Air Support

### TESTIMONIAL - Sergeant Kevin Nixon. Northumbria Police Force.

“The CTS-PRAS laptop was invaluable last night for a high-risk missing person out in the hills, miles from anywhere. The 4G worked a treat and the ability to identify woodland and water nearby, when you are in the middle of nowhere at night, was a huge benefit!

The policy document wizard is superb and saves the PoISA lots of time, especially when they are under pressure allocating various resources. The email functionality is indispensable on the device & allows us to quickly share information with others.”
